## General Comment

Everyone knows that the Federal Government has been "selling" coal, gas, and other mineral wealth at prices way below actual value. It has literally been giving away the store. I am strongly opposed to repealing of the Consolidated Federal Oil and Gas and Federal and Indian Coal Valuation. The prior administration pushed this forward to correct a long standing deficiency in the leasing rules so that mining companies would have to pay a fair price for these valuable resources. DO NOT REPEAL!! Let's be fair. Please do not sell out the valuable resources of the American People to private mining interests at below market prices! Don't forget our "yuge" national debt!!!
