General Comment

Any time we hear that the government is going to simplify a process or entity by increasing regulations on it, we become very suspicious and very concerned about increased government control of said activity that will certainly restrict our ability to govern our own lives and will result in a loss of personal revenue, freedom of participation and most likely increased taxation on the American people. We have too much government control over our lives and livelihoods as it is, so we do not support this additional regulation on commercial activities involving our natural resources. Our economy has not recovered enough to sustain further curtailment of it. Unfortunately, many more jobs will be lost, costs of energy will rise as will the cost of everything we purchase. It is becoming harder and harder to make a decent living that provides for our needs. We need less government regulations - not more, especially over our natural resources, like, coal, gas, and oil! Thank you!
