General Comment

All these rules do is make it harder for companies to do a profitable business and keep jobs open .Also it will result in a lot higher electric rates because the renewable resources that replace coal are 25 to 30 percent higher to produce and not as reliable. All these rules aren't just about taxes. There main purpose comes from extremist environmentalist as another tool to shut carbon based fuels from being used no matter what the cost even if it runs business out of the U.S.A .They don't understand(or care) that higher cost for coal hurts the middle to under class the most.Just take a look at what most of them drive and where they live .
