General Comment

to totally understand the entire proposal would be an undertaking that most do not have the knowledge or information to see the full extent of this rule , most of us americans are in agreement that these proposals are wrote in a manner to cause much confusion and mislead most from the whole picture , case in point the massive Obama health care bill . this proposed rule as I understand it will have a huge impact on the coal industry and impact on the economy of the states that produce coal and oil , not only for foreign markets , but domestic as well . it seems that the states that supply the majority of energy for the country have the least say on their own livelihood . this will impact life as we all know it here , not only now but for generations to come . sincerely one of Wyoming's lifelong residents.
