I am writing this in support of Coal mining in WY. I realize that there is a lot of media hype and uneducated "environmental people" fighting to kill coal in the US. The fact is that we have the cleanest burning coal in the world and our coal mines and coal miners are clean and happy. If they were really 'green' they would want our coal to go around the world to help clean up pollution.

I am in support of Rescinding the coal valuation rule that was designed to artificially drive up the cost of coal mining on federal land and damage coal exports. Please rescind the 2017 Valuation Rule and continue with the existing rules that work.
