To the Secretary of the Interior -

In regard to Regulation Identifier Number (RIN) 1012-AA20, I ask you to oppose the repeal of the "2017 Valuation Rule." Fossil fuel companies need to pay their taxes - all of them. Federal agencies have a duty to ensure state and federal taxpayers get the full value for the natural resources extracted from our public lands. Allowing companies to pay royalties from sales to wholly-owned subsidiaries does not represent fair market value. Royalties should be charged at the point where resources are sold to an independent third party.

Thank you - Lauran Emerson
