Secretary Presents 20 Presidential & Executive Leadership Awards

WASHINGTON -- Acting Secretary of the Interior Lynn Scarlett today presented top awards recognizing 20 members of the Senior Executive Service at the Department of the Interior. She presented the 2005 Presidential Rank Awards to four individuals, honored one executive with that award posthumously, and presented the Secretary’s 2005 Executive Leadership Awards to 15 others.

In a ceremony at the department’s headquarters in Washington, Scarlett said these top award recipients served as examples for other federal employees “with their dedication and determination, their passion and compassion.”

“Your leadership at the Department of the Interior and throughout your public service has helped all of us to accomplish so much more on behalf of the American public than had we not been blessed by your service,” said the Secretary.

Tom Weimer, Assistant Secretary of the Interior for Policy, Management and Budget, described the several types of awards.

Presidential rank awards recognize Senior Executives who have demonstrated exceptional performance over an extended period of time. There are two types of rank awards.

The *Distinguished Executive* rank award is given for “sustained extraordinary accomplishment” to no more than 1 percent of the career SES government-wide. The *Meritorious Executive* rank award recognizes “sustained accomplishment” of no more than 5 percent of career SES government-wide.

Within the department, the Secretary’s Executive Leadership Awards were created to recognize extraordinary performance and excellence in leadership. The criteria include extraordinary accomplishment of the performance
elements in the SES member’s annual performance agreement and
demonstration of excellence in the five Executive Core Qualifications.

The 20 awardees have worked at the departmental level or in one of Interior’s bureaus—including the National Park Service, Fish and Wildlife Service, Bureau of Land Management, Bureau of Indian Affairs, U.S. Geological Survey, Office of Surface Mining and Minerals Management Service. Their names and biographies follow.
