Section 8 Table of Contents

1	288VOL.XLS No Date	Major Portion Calculation February 1988 2/88 Volume Summary	2 Page excel document Both listed as Attachment 2
2	ADDROY.XLS	Spreadsheets	118 pages of Payor numbers and royalty values 1 page Summary of Royalty Paid and Royalty Due by Payor
3	ALLOWDW.XLS	Spreadsheet	1 Page excel document Includes number of leases by payor and whether or not dual account was performed
4	CATCHECK.WPD	NGPA Price Certification No Date	2 page document including sampling methodology and sample results
5	MRAT.WPD	List of Attachments for Methodology Report No Date	1 page document listing attachments for Methodology Report
6	NGPA.WK1	Spreadsheet No Date	Includes Well No., Applicant, Well Name, Reservoir, Date App. Rec'd, Doc. No., Purchaser, etc.
7	PRCBUMP.WPD	Proposed Method for Escalation of Gas Prices for Jicarilla Apache gas leases resulting from El Paso and Northwest Contract Settlement Agreements No Date	3 page document, includes conditions of settlement agreements
8	RIKLISTG.WK1	Listing of Jicarilla Apache Tribal Royalty-In-Kind Leases No Date	1 page listing of Jicarilla RIK leases
9	VSDMP.WPD	Letter No Date	5 page form letter to royalty payors describing requirement of major portion analysis on Jicarilla Apache leases

NGPA Price Certification

Sampling Methodology

The verification of correct NGPA pricing consisted of a random sample of monthly settlement statements provided by the Tribe. Approximately 30 individual well records were randomly selected from each settlement statement. The price shown on the settlement statement was compared with the NGPA categories[1] as previously determined for each well. For the post-settlement period a smaller sample was reviewed to verify that the settlement contract price was used.

Sample Results

With the use of this method, MMS should be able to verify that the Jicarilla Apache Tribe recieved the proper price for the natural gas sold in the time period under examination. The table below shows the results of the verification. The most common error was wells classified as Category 108 on the BLM list paid under Category 104. Of the approximetly 150 lines analyzed, 7 lines fell in this category. One El Paso well, for the 2/89 analysis paid $2.50 which matches the price paid during the suspension of NGPA pricing.

El Paso		Northwest	
2/89	2 wells classified as 108 paid on 104; several well classifications missing, one price was $2.50	2/85	2 wells classified as 108 paid on 104
7/88	1 well classified as 108 paid on 104; well classifiction missing	2/84	2 wells classified as 108 paid on 104
11/90	post-settlement/price matches	2/88	wells paid on NGPA or on lower contract price
12/89	post-settlement/price matches		
3/90	post-settlement/price matches		
11/89	post-settlement/price matches		
11/93	post-settlement/price matches		
6/91	post-settlement/price matches		
12/90	post-settlement/price matches		

[1] A Listing of NGPA categories for each well was supplied by Allen Buckingham, Bureau of Land Management, Albuquerque, NM Office.

4/91	post-settlement/price matches		

Conclusions

Based on this brief analysis, appproximately 95% of the lines analyzed showed the correct payment. Possible discrepencies could result from errors in the BLM data. Well classification did change over time; the changes may not have been reflected in the database.

I would conclude that the Jicarilla Apache Tribe recieved proper prices during the time in question.

Proposed Method for Escalation of Gas Prices for Jicarilla Apache gas leases resulting from El Paso and Northwest Contract Settlement Agreements

In 1989 both Northwest Pipeline Corporation (Northwest) and El Paso Natural Gas Company (EL Paso) entered into settlement agreements the Jicarilla Apache Tribe. These settlements were designed to cancel a 1975 Royalty Gathering and Exchange Agreements between the Tribe and the companies.

The El Paso Settlement Agreement had the following conditions:

- Signed 7/1/89
- Required $14.722 million payment to the Tribe
- Called for El Paso to use the following prices ($/MMBtu) for any future gas delivered from leases on the Jicarilla Reservation:

1989	$1.227	1990	1.276
1991	1.327	1992	1.380
1993	1.435	1994	1.493
1995	1.553		

The Northwest Settlement Agreement had the following conditions:

- Signed 1/1/89
- Required Northwest to pay $10.450 million to the Tribe.

The assumption by the Tribe is that these monies are a discounted cash payment used to "buy down" the future gas prices specified in the original Royalty Gathering and Exchange Agreements. The Tribe requested that MMS estimate the incremental gas price that his amount represented had the "buy down" not occurred.

At the request of the Tribe during the settlement negotiations, Strata Evaluation Associate (Strata) developed a projected gas supply for both the Northwest and El Paso wells as shown in Table 1. MMS then calculated a total annual MMBtu volume using an average Btu content of 1,158[1] as shown in Table 1.

---

[1] This is based on an arithmatic average of the Btu contents of the following formations: Fruitland 1123; Pictured Cliffs 1117, Chacra 1147, Mesa Verde 1149, Gallup 1199, and Dakota 1212. Source: Gas Research Institute

Table 1				
year	Northwest (MCF)	El Paso (MCF)	Total (MCF)	Total MMBtu
1989	2,184,166	664,154	2,848,320	3,297,879
1990	2,000,396	1,231,551	3,231,947	3,742,055
1991	1,838,459	1,134,485	2,972,944	3,442,173
1992	1,694,483	1,047,835	2,742,318	3,175,146
1993	1,565,509	969,717	2,535,226	2,935,368
1994	1,449,542	898,891	2,348,433	2,719,093
1995	898,551	420,466	1,319,017	1,527,201

The next step was to determine at what price would this volume generate the discounted $25.172 million payment . The Strata reports to the Tribe discussed various discount factors ranging from 8 - 10%. The following determination used a discount factor of 9.125% (the rate for a Tribal Revenue Bond discussed in the Northwest report). A 1988 present value[2] was determined for the projected revenue stream. The gas price required to generate the $25.172 million amount is approximately $1.636/MMBtu.

[2] Present value = future value * $[1/(1+i)^n]$ where n is the number of time periods and i is the interest rate.

year	Total MMBtu	Price MMBtu	Projected Revenue (millions)
1989	3,297,879	$1.636	$5.395
1990	3,742,055	$1.636	$6.122
1991	3,442,173	$1.636	$5.631
1992	3,175,146	$1.636	$5.195
1993	2,935,368	$1.636	$4.802
1994	2,719,093	$1.636	$4.448
1995	1,527,201	$1.636	$2.499

This would result in the following theoretical adjusted contract price for the Jicarilla gas sales.

year	Contract Price	Settlement Escalation	Pseudo-major portion price
1989	$1.227	$1.636	$2.863
1990	$1.276	$1.636	$2.912
1991	$1.327	$1.636	$2.963
1992	$1.380	$1.636	$3.016
1993	$1.435	$1.636	$3.071
1994	$1.493	$1.636	$3.129
1995	$1.553	$1.636	$3.189

Dear Name

In carrying out the trust responsibility of the United States in the administration of Indian oil and gas leases, the Minerals Management Service (MMS) has long recognized the primacy of the lease terms. As a royalty payor on Jicarilla Apache Indian Tribe (Jicarilla Apache) leases, you are obligated to comply with Section (c) **Rental and royalty**, of the Indian lease terms, which states, in part:

> During the period of supervision, "value" for the purposes hereof may, in the discretion of the Secretary, be calculated on the basis of the highest price paid or offered (whether calculated on the basis of short or actual volume) at the time of production for the major portion of the oil of the same gravity, and gas, and/or natural gasoline, and/or all other hydrocarbon substances produced and sold from the field where the leased lands are situated, and the actual volume of the marketable product less the content of foreign substances as determined by the oil and gas supervisor.

This requirement, commonly called major portion analyses, is also embodied in the oil and gas valuation regulations found at 30 CFR 206 (1987) and in the amended valuation regulations at 30 CFR §§ 206.152 and 206.153 (1995). Title 25 CFR 211 (Indian tribal) and 212 (Indian allotted) (1987) also recognize this requirement.

MMS has performed major portion analyses for natural gas production from Jicarilla Apache leases for the period **January 1984 through (June?)December 1995**. We have used gas sales data reported by the Jicarilla Apache Tribe under their Royalty-in-Kind program to determine major portion prices for the Jicarilla Apache Indian Reservation (Reservation) by production month. We have determined that the Jicarilla Apache sold the majority of their RIK production

based on the Maximum Lawful Price (MLP) as set by the Natural Gas Policy Act (NGPA).

Enclosure _ provides a list of NGPA prices by NGPA category. Enclosure __ provides a list of your accounting identification (AID) numbers for the Reservation and available NGPA categories and wells for those AID numbers. If you have additional information about NGPA categories please identify these classifications. If you are not currently responsible for payment of royalties for the lease numbers in Enclosure __, please identify the responsible party and the date the lease(s) were assigned to the other company.

Please compare these values to the values you reported to MMS on Form MMS-2014. Please identify and document with copies of contracts or lease settlement statements, any differences you feel are not valid. You must pay additional royalties for those gas sales that are less than the MLP value. Please be aware of the following when paying the additional royalties:

- Follow the procedures outlined in 30 CFR § 218.51 (1996).

- If you are not currently a royalty payor to MMS or if you have questions on the completion of the Form MMS-2014, please contact your Reports Branch representative at (303) 231-3287.

- **You must use adjustment reason code 49 when you report your additional royalties on Form MMS-2014.** This adjustment reason code must be used for both the reversal line and the re-entry line.

- Late payment charges under 30 CFR § 218.102 (1996) will be computed and billed to you upon receipt of payment of the additional royalties due.

MMS will compare these major portion values to your Form MMS-2014 information approximately 60 days from the date of this letter. We will send you an official order to pay additional royalties for those instances where your royalty value is still less than these major portion values.

MMS is also conducting a review of dual accounting on Indian leases. MMS (has previously?) issued an order to company (Comp) to provide a declaration of policy on dual accounting. On your ____, 19__ response, you stated that the company (did or?) did not perform dual accounting on the Indian leases for which Comp is a royalty payor. Based on the review of a sample lease under section 3(c) entitled "Rental and Royalty", we determined that the lease terms require dual accounting. Our review shows that, Comp did not perform dual accounting calculations in determining royalties due on the lease and, as a result, additional royalties may be due.

Dual accounting requirements are specified by Indian lease terms, Federal regulations, and MMS' instructions. Federal regulations at 25 CFR §§ 211.13 (1996) and 212.16 (1996) state:

> In determining the value for royalty purposes of products, such as natural gasoline, that are derived from treatment of gas, a reasonable allowance for the cost of

manufacture shall be made, such allowance to be two-thirds of the value of the marketable product unless otherwise determined by the Secretary of the Interior on application of the lessee or on his own initiative, and that royalty will be computed on the value of gas or casinghead gas, or on the products thereof (such as residue gas, natural gasoline, propane, butane, etc.), whichever is the greater [Emphasis added.]

Dual accounting is defined as a valuation method that compares the value of the gas prior to processing, as determined under 30 CFR § 206.152 (1996), to the value of that same gas after processing (the combined values of the residue gas and gas plant products), as determined under 30 CFR § 206.153 (1996). Where the specific provisions of a lease are inconsistent with these regulations, then the lease agreement shall govern to the extent of that inconsistency. Royalty on gas produced from an Indian lease and ultimately processed (either by the lessee or any purchaser) must be computed by applying the dual accounting requirements specified by the lease. Indian royalty is to be calculated and paid based on the method yielding the higher value. However, royalty is never to be based on a value which is less than the gross proceeds received by the lessee. (After March 31, 1988, if royalties are paid pursuant to the processed gas valuation method, the requirements to submit appropriate allowance forms prior to claiming transportation and/or processing allowances must be met. (See 30 CFR § 206.156 through 206.159 (1996))).

By "Dear Payor" letter dated September 30, 1988 (Enclosure __), MMS emphasized the requirement with notice that failure to comply with Indian lease terms and the regulations applicable to dual accounting would subject payors to enforcement actions by MMS, including civil penalties as provided by 30 CFR § 241.51 (1996).

Therefore, in order to comply with regulations and lease terms, within __ days of receipt of this letter, Comp is ordered to perform the following:

1. For each Indian lease for which the dual accounting requirement is specified in the lease terms, Comp is hereby directed to recalculate royalties following the dual accounting requirements from January 1984 through December (June?) 1995. For those months listed on Enclosure __, MMS has calculated majority prices for leases within the Reservation Comp must use the higher of the MMBtu prices listed on Enclosure __ or the gross proceeds MMBtu price received for wellhead and the residue gas values in the dual accounting calculations.

   If Comp is unable to obtain the necessary information to perform dual accounting as required by the lease terms, Comp is directed to apply the theoretical dual accounting as explained in the MMS' "Dear Payor" letter dated July 27, 1992 (Enclosure __). MMS has provided a worksheet for theoretical dual accounting calculations and a diskette with the Excel worksheet on it in order to assist Comp in completing dual accounting calculations (Enclosure __). If needed, MMS can provide assistance in completing these calculations.

2. Compare royalties due as calculated in step (1) to royalties previously paid for each month and pay any additional royalties due. All such redeterminations are to be documented in the format shown in Enclosure __.

Your payments should be made in accordance with the regulations at 30 CFR § 218.51 (1996), and accompanied by an appropriately completed green Form MMS-2014 (Enclosure __). A copy of your payment and the green Form MMS-2014 should be sent to the address shown below.

Appropriate late payment charges pursuant to 30 CFR § 218.102 (1996) will be computed and billed to Comp upon receipt of payment of any additional royalties due.

All documentation supporting your compliance with this order should be retained until MMS completes its follow-up compliance testing. After the period covered by this order, Comp should continue to value production for royalty purposes in accordance with regulations and guidelines discussed in this order. If MMS determines that the required accounting has not been performed, or the future royalty payments do not comply with this order, the violation may be considered willful.

Section 109 of the Federal Oil and Gas Royalty Management Act of 1982 (FOGRMA), promulgated in 30 CFR § 241.51 (1996), authorizes MMS to assess civil penalties for failure or refusal to comply with the requirements of FOGRMA or any statute, regulation, rule, order, lease, or permit. Consequently, your failure to comply with the terms of this order may be considered a violation pursuant to 30 CFR § 241.51 (1996) and could subject you to appropriate penalties as provided therein.

You have the right to appeal in accordance with the provisions of 30 CFR 290 (1996). Any appeal taken will be to the Deputy Commissioner of Indian Affairs and must be filed within 30 days from the receipt of this order at the following address:

Ms. Deborah Gibbs Tschudy
Chief, Royalty Valuation Division
Minerals Management Service
P.O. Box 25165, Mail Stop 3152
Denver, Colorado 80225-0165

Any notice of appeal must be accompanied by written statement of reasons, as you deem adequate to justify reversal or modification of this directive. Within 90 days from receipt of this order, the appellant will be permitted to file additional statement of reasons or written briefs.

With the exception of the time fixed for filing a notice of appeal, the time for filing any document in connection with an appeal may be extended. Extensions for filing the statement of reasons will not be permitted unless requested in writing by the appellant (within the 30-day period allowed for filing the appeal) with justification showing good cause for the time extension and delivered to Deborah Gibbs Tschudy at the above address.

In accordance with the provisions of 30 CFR § 243.2 (1996), compliance with this order will be suspended by reason of an appeal having been taken.

If you have any comments or questions concerning this request, contact Joseph Cornellisson at

(303) 275-7239.

Sincerely,

Deborah Gibbs Tschudy
Chief, Royalty Valuation Division
